

Automatic Test of Documentation

“Discuss & Hack”

Let us fight Documentation Rot together

I bring

a brief talk to inform the discussion:

- a summary of challenges associated with this problem
- overview of existing tools that I know

You bring

- additional information for the discussion
- suggestions and criticism
- your documentation to test

Goals and What you (may) get:

- your docs tested
- in CI
- sketch/design a tool that is better than existing tools in some sense
